A Typical Golden Oak Production

Golden Oak Graceful 3d, pictured, certainly has all of the valuable qualities that we are striving for in Shorthorns today. Sired by the \$5000 Prince Peter, she is typical of Golden Oak Farm Productions. First prize junior heifer calf at all 1946 leading Shows, she was Reserve Champion female at the 1947 Denver and Ft. Worth Shows.

The scientific breeding of Shorthorns is a long established custom at Golden Oak Farms. It was in 1922 when the herd was started and since that early date the incentive to produce the best of the breed has been there. The careful blending of proven bloodlines is the secret of their success. It has made possible the production of bulls and females, whose performance in the show rings and breeding herds all over America have been successful. An inspection of the Golden Oak herd today, numbering well over 200 head will cause anyone to agree that the blending of Prince Peter and Edellyn Royal Leader 14th BLOOD is doing the job at Golden Oak Farms today.

I am personally aware that the owners of Golden Oak Shorthorns are going all out to make this the greatest offering ever sold in the Southwest. Private demand for Golden Oak Shorthorns has always been good. Proof of this is the fact that this is their first auction at the farm. Even then, they have had to earmark cattle from their 1947 and 1948 show herds and others directly from their breeding herd in order to make this event possible.

The fifteen young herd sire prospects and 25 bred and open heifers are each and every one unusually desirable from the standpoint of quality, breeding and type. An unusual attraction is the twenty head of cows and calves. . . many of these cows have produced the top selling and top winning cattle from this herd and have at foot full brothers and sisters to the above winners.

I say, you can't miss this event, no matter where you live if you are interested in the production of good shorthorns.

MERV AEGERTER,
Sale Manager, Seward, Nebraska.
